🪪 PROFILE

I'm a web developer with 2 years of frontend experience and a passion for responsive website design. I have created and maintained e-commerce websites and created SEO-friendly structures with the help of SSR. I'm also learning backend development on the side, and I'm always looking to learn modern technologies, software architecture solutions, and clean code methodologies.

🧠 SKILLS

React
Built typesafe applications with Next.js and TypeScript, used data fetching strategies like SSR & SSG & ISR, and client-side data fetching with React Query, SWR , created reusable custom components

State Management
Experience with React Query for managing server-state, Redux (Toolkit), Context API

Styling
Experience in Responsive Design & Mobile-First approach with TailwindCSS, CSS in JS libraries like Styled-Components, Familiar with Storybook, Familiar with SASS

Testing
E2E Testing with Playwright, testing React components with React Testing Library, Jest, Vitest

Tools
Git and GitHub, Docker, Familiar with CI/CD workflows like GitHub Actions, Familiar with Monorepos like Turborepo

Backend
Experience in ExpressJS, tRPC, Prisma ORM, Relational Databases like PostgreSQL, MySQL, and Document Oriented like MongoDB, Familiar with Firebase

---

📁 PROJECTS

KARA Shop, *karashop.vercel.app* 🔗   Jul 2022 – present
- Built with NextJS & TypeScript
- Implemented End-to-end typesafe APIs with tRPC
- Used PostgreSQL with Prisma ORM
- Implemented Authentication with Next-Auth
- E2E Testing with playwright
- Styled with TailwindCSS
